

BETTER SCIENCE. BRILLIANT WATER.®

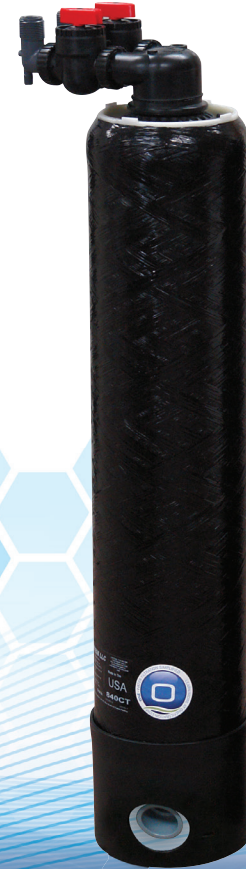

WATER FILTRATION SIMPLIFIED™

The unique ONE™ cartridge tank filter system is the ideal solution for the removal of a multitude of particulates. Designed to replace smaller, commonly used cartridge filters, the ONE system can utilize a variety of large capacity cartridges which greatly extends replacement frequency. Enjoy clean, crystal clear water from our revolutionary ONE filter system that is easy to use and virtually maintenance-free.

Residential Model: EF-835-1

The EF-835-1 Cartridge Tank comes equipped with a top mount valve including bypass and is available in multiple cartridge types. These filters offer excellent filtration and, because of their size, outstanding retention capabilities for residential and light commercial applications.

SYSTEM FEATURES

- Primary whole house filtration
- Polishing filter
- Taste and odor removal
- Particulate removal
- Greatly extends the life between cartridge changes
- Low pressure drop and high flow rate capabilities
- Easy, replaceable cartridge design

Every home deserves the right filtration system to provide quality water. As your professional Evolve dealer, we will analyze your water and configure the precise whole house filtration system for your needs.

Easy To Maintain

Cartridge changes can be achieved quickly by removing the top cap assembly for easy access to the cartridge. Simply lift out, dispose, and place a new cartridge filter in place and replace the top cap.

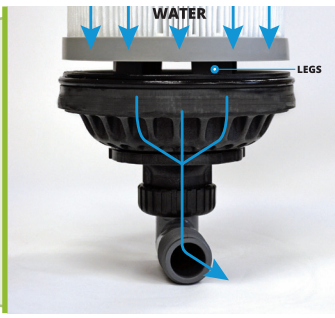

How It Works

During service, water enters and flows downward through the housing and is forced through the cartridge assembly. As the water flows through the cartridge, this filtered water is captured by the center distributor tube and is directed to the outlet side of the head and to the home. During a rinse cycle, the water enters into the tank and flows past the surface of the cartridge and runs to the bottom drain. This flushing action will clean the surface of the cartridge. Once the accumulated debris has been flushed to drain the valve is closed and the ONE Filter is ready to resume filtration.

Exclusive Design

The unique 'stand off' leg feature at the bottom of each cartridge allows debris to clear from the filter and travel down from the tank through the bottom drain. This keeps the filter cleaner longer, extending the life of the cartridges.

THE RIGHT CARTRIDGE FOR YOUR WATER.
