

Sanitizer Plus Series® Conditioners

A New Level of Intelligence in Self-Sanitizing Water Treatment

The Sanitizer Plus Series® features an optional weather cover for outdoor installations.

It's the Media ...

At the heart of Sanitizer Plus's performance is the Crystal-Right® media, a crystalline media exclusive to Water-Right, Inc. In a single pass, this unique media does more to remove hardness, iron and manganese while raising low pH levels, than any other media available today.

It's the Control Valve ...

Advanced — Easy-to-read digital lettering clearly spells out all commands and functions. An audible chirp even alerts you to "low salt" conditions or other service needs.

Powerful — This unique controller remembers all operating functions and will never lose programming due to a power failure. System regenerations are automatically activated according to actual water consumption and patterns.

Intelligent — Advanced history screens inform you of gallons used each day and total number of gallons used over the lifetime of the unit. This smart controller will also display total regenerations and even errors.

It's the Company ...

Since 1963, Water-Right, Inc., a family-owned company, prides itself on providing both professional and personal service. Today, the Water-Right brand is found around the globe as we continue to provide "the right water for life."

SERIES **Plus**

Your local water treatment professional:

Protect Your Household

Water-Right's Sanitizer Plus Series® water conditioners have a proven history of treating problem water. As Water-Right's first self-chlorinating water conditioner, they remain one of the most innovative and effective systems in the market today. The Sanitizer is unmatched in removing hardness, iron and manganese while raising low pH levels — all in a single pass.

All of this helps ensure protection of your household plumbing from staining, scale and mineral deposits, while maintaining the benefits of softened water.

When armed with the right tools — media, control valve, chlorine generator and the Water-Right company itself — no other water treatment solution can compare in features or performance. Protect your home and your family with the best.

It's the Chlorine Generator ...

The Sanitizer Plus uses a patented chlorine generator technology which produces chlorine to kill and remove unwanted iron and sulfur bacteria — the same nuisance bacteria that produces foul smells and the "slime coating" inside plumbing fixtures and toilet tanks.

Patent No. 6,726,817

Sanitizer Plus Series® Conditioners

A New Level of Intelligence in Self-Sanitizing Water Treatment

A Single System Used to Effectively Treat Water in a Single Pass

- Removes hardness
- Removes iron
- Removes manganese
- Raises low pH levels
- Reduces iron and sulfur bacteria
- Reduces unpleasant tastes and odors

Sanitizer
SERIES **Plus**

Sanitizer Plus Series® water treatment systems combine patented self-chlorinating technology with advanced electronics to perform like four units in one — softening, removing iron and manganese, and raising low pH levels. This self-sanitizing system also controls odors caused by nuisance bacteria and minor sulfur conditions.

- Exclusive Crystal-Right™ media to remove hardness, iron and manganese, correct pH and control odor
- Patented self-chlorinator technology for bacteria control
- Single-unit operation — no chemicals or added equipment
- Visual and audible “Check Salt” indicator
- Extended lithium battery backup
- Overrun capacity protection
- Flexible “adjustable cycle sequence” programming — saves salt and water
- Advanced history and diagnostic screens

WaterRight®
The Right Water
for Life
