

# Whole House Chlorine Injection System

Live Pure!

*"The most aggressive attack on bacteria and odors."*

Chlorine not only kills, bacteria & Viruses, it is also used to oxidize stingy contaminants that otherwise won't come out with conventional media filtration.

## USES:

- Strong Hydrogen Sulphide Odors
- Bacteria /viruses
- Tannins/ Colors
- Iron/Manganese oxidant
- Converts Arsenic III into V

## Process / Equipment

- 1 Chemical pump injects chlorine into Well Water automatically via a flow meter.
- 2 Chlorinated Water is stored in a large Fiberglass contact tank (80 or 120 gallon option).
- 3 Water then Passes through a contaminant specific Multi-Media filter composed of carbon, zeolite, gravel & greensand to remove oxidized material.
- 4 If necessary, water can then pass through a water softener , arsenic filter, neutralizer or whatever type is system that is recommended.
