

# Post R/O Remineralizer Alkalinity Filter

# Live Pure!

For Today's Health Conscience Individuals

## WHY:

- Raises R/O water pH from 5 to as high as 9.
- High pH water penetrates Red Blood Cells and acts as an anti-oxidant.
- Adds necessary minerals back into otherwise mineral free R/O water.
- Oxygenates the water.

Each number on the pH scale is 10% stronger than the level below e.g. A soda at pH 3.0 is 1 million times more acidic than a healthy pH 9.0 water.

Regular Cost	Preferred Customer Price
<del>\$191.40</del>	<b>\$174</b>
Installs under the sink as an r/o post filter.	

There is no additional install charge if our service technician is already at your service location. This filter adds Oxygen & Air Bubbles to your water.
